

### Amendments to the Specification

Please replace the paragraph that begins on Page 1, line 6 and carries over to Page 2, line 5 with the following marked-up replacement paragraph:

-- The present invention is related to the following commonly-assigned co-pending applications, which were filed concurrently herewith and which are hereby incorporated herein by reference: U. S. Patent \_\_\_\_\_ (serial Patent 7,005,988 (serial number 10/665,282, titled "Using Radio Frequency Identification to Detect and/or Prevent Theft and Shoplifting"; U. S. Patent \_\_\_\_\_ (serial Patent 7,012,528 (serial number 10/666,703, titled "Using Radio Frequency Identification with Transaction-Specific Correlator Values Written on Transaction Receipts to Detect and/or Prevent Theft and Shoplifting"; U. S. Patent \_\_\_\_\_ (serial number 10/666,287, titled "Using Radio Frequency Identification with Transaction-Specific Correlator Values to Detect and/or Prevent Theft and Shoplifting"; and U. S. Patent \_\_\_\_\_ (serial number 10/666,700, titled "Using Radio Frequency Identification with Transaction Receipts to Detect and/or Prevent Theft and Shoplifting". --

Please replace the paragraph that begins on Page 22, line 14 and carries over to Page 23, line 12 with the following marked-up replacement paragraph:

-- Commonly-assigned, co-pending U. S. Patent Application 09/790,104 (filed on Feb. 21, 2001; now U. S. Patent 7,000,834), entitled "Method to Address Security and Privacy Issues of the Use of RFID Systems to Track Consumer Products", which was briefly discussed above, discloses techniques to prevent global tracking of people and the items they have purchased containing RFID tags, in addition to techniques for using RFID technology to prevent tampering

of product information stored in RFID tags and to prevent pricing mistakes made at the point of sale. Commonly-assigned, co-pending U. S. Patent Application 09/847,889 (filed on May 3, 2001; now U. S. Patent 7,076,441), entitled "Identification and Tracking of Persons Using RFID-Tagged Items", discloses techniques for using RFID technology to identify or characterize people, based on the RFID tags present in items being carried by that person at a point in time. If a prior-purchase database is provided with information about which person bought particular uniquely-identified items in the past, then the RFID tags may be used to locate information in the database that will identify the person currently carrying the items. Otherwise, the person can be characterized based upon the types of items he is currently carrying (as determined by reading the RFID tags of the items). Commonly-assigned, co-pending U. S. Patent Application 10/612,251 (filed on July 2, 2003; now U. S. Patent 6,992,574), entitled "Object Matching via RFID", discloses techniques for using RFID technology to track and match objects, when the RFID tags of these objects have been programmed with data suitable for indicating that the items are in association with one another. These commonly-assigned inventions are hereby incorporated herein by reference as if set forth fully. --
